

WORKSHEET A.4.M5

Multimedia - Image

What we will learn today:

- Create a new image in GIMP
- Recognise the basic GIMP tools
- Add layers to an image and explain their purpose
- Remove the background from an image
- Export the result as a JPEG or GIF image

Consolidation Activities

1. Create the image shown below by combining the images in the ask1 folder. Save the image in your folder as image1.jpg.

Steps

- (a) Open GIMP.
- (b) Open Football_goal.jpg from the ask1 folder: File > Open.
- (c) Open Football.jpg from the ask1 folder: File > Open.
- (d) Use one of the selection tools to select the ball.

- (e) Copy your selection.

- (f) Return to Football_goal.jpg and add a new transparent layer: Layer > New Layer.
- (g) Paste the ball into the new layer.
- (h) Resize the ball using the Scale tool.

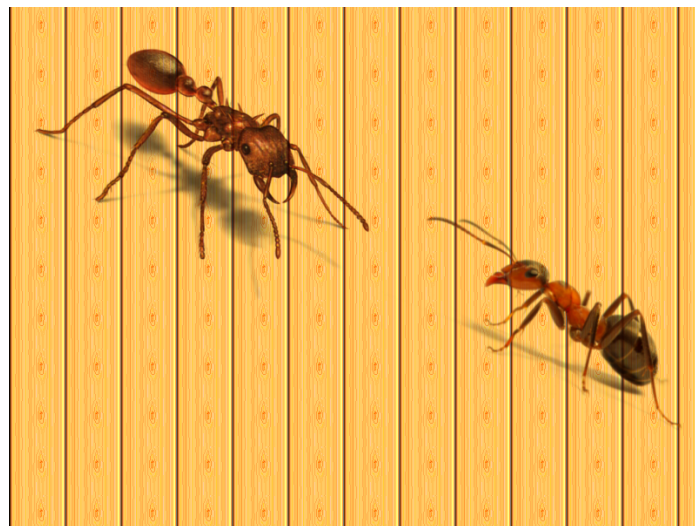

- (i) Move the ball to the position you want using the Move tool.

- (j) Save the image as ask1.xcf.
- (k) Export the image as a JPEG file named ask1.jpg: File > Export To.

Assessment Activities

- 2. Create the image shown below by combining the images in the ask2 folder. Save it in your folder as image2.jpg.

Notes

- (a) To remove the white background from the ants, choose Colors > Color to Alpha.
- (b) To apply the wooden background, drag and drop the background from the pattern onto the background layer.
