

WORKSHEET A.4.M6

Multimedia - Image

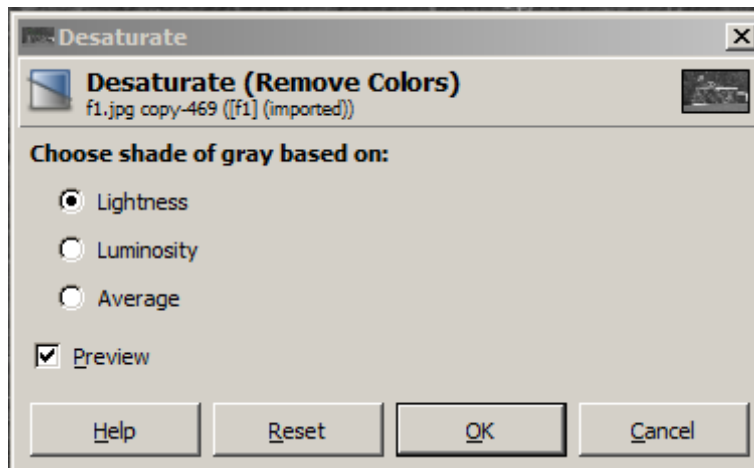

What we will learn today:

- Convert an image to black and white
- Highlight one area of an image using desaturation
- Change the hues of an image

Consolidation Activities

Activity A

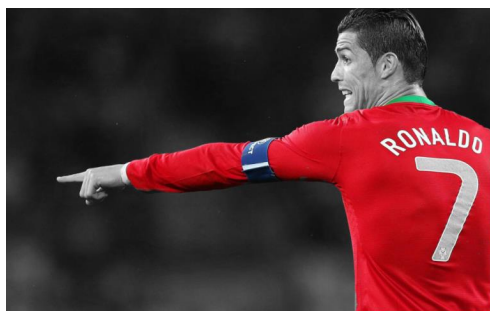

1. Open Ronaldo.jpg from your folder.
2. Duplicate the image layer: Layer > Duplicate Layer.
3. Convert the new layer to black and white: Colors > Desaturate.

4. Add an Alpha Channel to the black-and-white layer: Layer > Transparency > Add Alpha Channel.
5. Use the Eraser to remove the grey colour over the footballer's shirt.

6. Remove the selection outline: Select > None.
7. Save the image in your folder.
8. The image should look like the example below.

Activity B

9. Open audi.jpg.

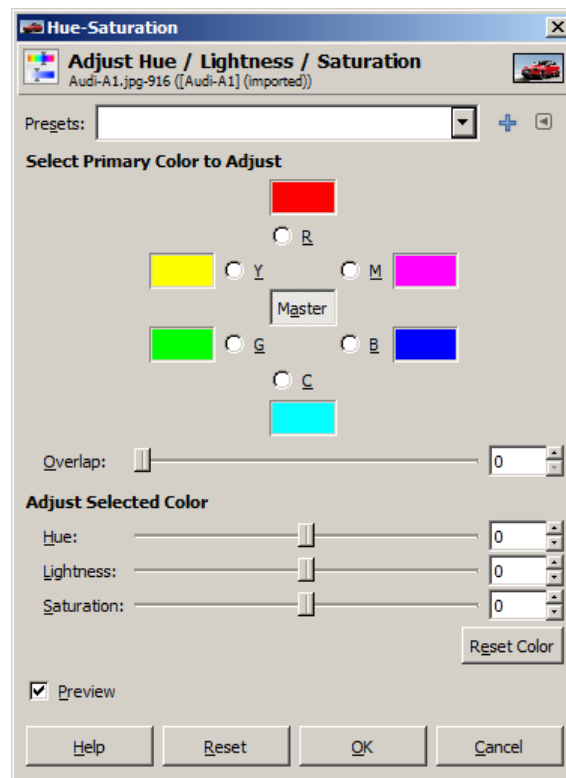

10. Use the Foreground Select tool to draw a rough outline around the car.

11. During the second step of the same tool, brush over the car colours that you want to change.

12. Press Enter on the keyboard.

13. Choose the car's new colour: Colors > Hue-Saturation.

14. Choose Select > None.

15. Save the image in your folder.
